

RK1+ & CPB-1 [IN-WALL KEYPAD AND CONTROL PORT CONNECTING BLOCK]

SIMPLE CONTROL FOR CLASSROOMS

Project Floorplan

Scenario

Most classroom projects are business-oriented and don't require an abundance of technological equipment. With RTI the control can be simplified and in this case doesn't even require a control processor, but a RK1+ 4-button keypad and a CPB-1 RS-232 interface to control projector, projection screen and a stereo mixer amplifier.

RTI combines robust capacity with one-touch simplicity to get the presentation started quickly and keep the audience engaged.

CLIENT WISH LIST

- Install a 4K projector and a projection screen
- Install an audio mixer amplifier (with a microphone input) and wall-mount speakers
- Simple, intuitive control of the audio and video devices

RK1+ 4-Button In-Wall Keypad with Customized Button Engraving

FEATURES

- Customized user interface for easy, intuitive control.
- Keypad with custom engraved buttons enable intuitive control.
- Combined Infrared / RS232 Interface controls projector, projection screen and Audio mixer / amplifier.
- System is scalable to an infinite number of classrooms, preferably connected to a central control processor
- Additional keypads or touchpanels can be installed in larger rooms
- Smartphone / Tablet control can be added
- Optional central processor for master control and monitoring of all connected rooms
- Optional Cloud-based management, monitoring and diagnostics with automated alerts (when used with a control processor)
